Registration No. S/86180 of 1996-97 under the West Bengal Societies Registration Act, 1961

**A Voluntary Organization Committed to the Cause of Science, Culture and Scientific Outlook**

Date: 23/08/2023

## **Statement on the successful soft landing of Chandrayaan-3**

Breakthrough Science Society congratulates the scientists and engineers of Indian Space Research Organization (ISRO) for their dedication to pushing the boundaries of space exploration and the remarkable feat of soft landing on the Moon. Chandrayaan-3, India's third lunar exploration mission, reflects the dedication, ingenuity, and relentless pursuit of excellence that define ISRO's work. This ambitious endeavour marks another significant step forward in humanity's exploration of the Moon and the pursuit of scientific knowledge.

The scientific community commends ISRO's commitment to advancing our understanding of the Moon, its geological history, and its potential for scientific discovery. The data and insights gathered from this mission will undoubtedly contribute to our knowledge of lunar geology, surface conditions, and potential resources. This knowledge, in turn, can shed light on Earth's history and evolution and guide future space exploration endeavours. The mission's success will inspire future scientists, engineers, and explorers.

As representatives of the global scientific community, we eagerly await the scientific outcomes of Chandrayaan-3's mission. Collaborative efforts such as these contribute to the collective pool of human knowledge and drive us closer to answering some of the fundamental questions about our place in the universe. It shows what human ingenuity can accomplish when harnessed for the greater good of the pursuit of knowledge.
